

Clinical Fellows Paed. Critical Care- PICU, NICU, CICU, CATS (ST6+)

NHS Medical & Dental Speciality Trainee (ST6-8)

Job overview

Great Ormond Street Hospital for Children NHS Foundation Trust

Start Date: Between January and December 2024

Clinical Fellows in Paediatric Critical Care (ST6+ Equivalent)

The critical care departments at GOSH, London, UK, invite applications for a training fellowship in intensive care medicine for children, which will start on the Paediatric Intensive Care Unit (PICU). Rotations can include time on the Neonatal Intensive Care Unit (NICU), Paediatric Intensive Care Unit (PICU), Cardiac Intensive Care Unit (CICU), and the Children's Acute Transport Service (CATS).

We are able offer bespoke paediatric and neonatal critical care placements for an anaesthetist, paediatrician, cardiologist, paediatric emergency physician or other relevant specialty wishing to gain paediatric intensive care medicine (PICM) experience. This could be a 6–24-months NICU/PICU/CICU/CATS placement with the possibility of extension, or alternatively, a one-year fellowship (including PICU, CICU and CATS) for those wishing to train as paediatric intensivists. Experienced PICM applicants approaching consultant level may wish to spend time on the 'PICU senior tier' – a pre-consultant leadership role with the opportunity to lead ward rounds and run the shop floor.

In addition, we offer time on the NICU/PICU/CICU within this application as stand-alone 6–24 -months posts. We welcome applications from registrars from a range of backgrounds with a range of experience and can discuss individual needs.
